

Existing Park Analysis

Al Safa 2 Park — Existing Conditions Inventory

1. Data Sources Available

- Ai Park - Master Plan (4).jpg — aerial/graphic location map (schematic level only)
- Al Safa Park 2 Plan (5).dwg — as-built AutoCAD drawing (AC1032 binary format)
- Competition Brief, Schedule 1 & Appendix (Schedule 8) references

2. What We Can Confirm Visually

- Park footprint is an elongated rectangular plot oriented roughly NW-SE, fronting a service road off Al Wasl Street.
- Visible tree canopy clusters concentrated toward the site's western portion; more open/hardscape appearance toward the east.
- A circular plaza/hub feature is visible near the park's approximate center (exact use unconfirmed).
- Single primary pedestrian access point visible on the west edge; extent of secondary access is not legible at this graphic's resolution.

3. What Requires the DWG (Not Yet Extracted)

The as-built DWG is a binary AutoCAD 2018 (AC1032) file. Python's open-source DXF tooling (ezdxf) cannot parse binary DWG directly — it requires either the free ODA File Converter (opendesign.com) to convert DWG→DXF, or opening directly in AutoCAD / BricsCAD / DraftSight.

Pending extraction, this file should yield:

- Exact site boundary polygon & precise area (validate the stated 15,000 sqm)
- Existing entrances (count, location, width)
- Path/track network (alignment, width, surfacing)
- Existing tree/planting locations and species (if labeled)
- Existing hardscape: plazas, seating, play equipment footprints
- Existing lighting poles, furniture, signage (if drawn)
- Existing utilities/services (drainage, irrigation, electrical) if included as a layer
- Existing buildings/structures (kiosks, restrooms, maintenance)
- Levels/contours (if a survey layer exists)

4. Existing Park Inventory Checklist (status)

Element	Status	Notes
Entrances	Pending DWG	1 visible in master-plan graphic (west side)
Paths	Pending DWG	Schematic path visible; no width/surface data

Element	Status	Notes
Trees	Pending DWG	Canopy massing visible west side; no species/count
Grass/lawn	Pending DWG	General green area visible; no exact sqm
Lighting	Not available	No lighting layer visible
Furniture	Not available	Not legible at graphic resolution
Playground	Not available	Not clearly identifiable
Sports facilities	Not available	Not clearly identifiable
Utilities	Not available	Requires DWG utility layer
Water features	Not available	None visible
Buildings/structures	Partially visible	Central plaza feature, function unconfirmed
Landscape character	Partial	Tree-dense west / open east (aerial impression)
Maintenance condition	Not available	Requires site visit/photos
Accessibility features	Not available	Requires DWG or site visit

5. Action Logged

Conversion of Al Safa Park 2 Plan (5).dwg to DXF is logged as an open task in 00_MASTER_TRACKER. Once available, this document should be re-run/updated with confirmed geometry rather than visual estimation.
