

One-Minute Concept Animation — Storyboard

Al Safa 2 Park — Production-Ready Shot List

Storyboard for the required 1-minute concept animation. An actual video is not generated by the analysis pipeline; this document gives shot-by-shot direction so the video can be produced (AI video tools are permitted by the brief for this deliverable). All visuals referenced already exist in the submission package.

Concept & Tone

60 seconds. Calm, confident, evidence-led. Warm sand/stone palette. Message: "AI helped us prove how to make this park usable all year — the design puts people and shade first." Voiceover optional; on-screen text captions required.

Shot List (60s)

Time	Visual	Caption / VO	Source Asset
0-6s	Aerial context: Al Safa 2 in Dubai, zoom to the park site	"Al Safa 2 Park — 15,000 m2, 7,640 neighbours within a 10-min walk."	master-plan location image + catchment_rings.png
6-14s	The problem: sun rising to overhead, park surface glowing hot	"Dubai's summer sun sits almost overhead — normal shade fails at noon."	fullyear_elevation_heatmap.png / sun path
14-22s	Data montage: temperature, sunshine, shadow charts animating in	"So we measured it — every hour of the year."	chart_temperature_humidity, fullyear_daily_peak_elevation
22-32s	The idea: the Shaded Spine draws itself across the plan, rooms appear	"One continuous shaded spine connects everything."	masterplan_diagram.png
32-42s	Shade simulation plays across seasons; spine stays covered	"99.2% shaded, all year — proven, not promised."	shade_coverage_simulation, annual_shade_hours_by_zone
42-50s	Section reveal: people walking shaded; trees, water-wise planting	"Native planting. A real ~5,700 m3/year water budget."	section_shaded_spine, water_demand_monthly
50-58s	Day-to-night dissolve of the aerial render; lights come on	"A park for all ages, day and night, all seasons."	aerial_day.png -> aerial_night.png
58-60s	Logo lockup: Dubai Municipality AI Park Design Challenge	"The Shaded Spine — Al Safa 2 Park."	title card

Production Notes

- Format: 1920x1080, 25/30fps, ≤1 minute, exported to a common format then zipped (the submission form accepts zip/pdf for this slot, max 100MB).
- All chart/render assets are in the phase output folders and can be used directly or re-rendered at higher resolution.
- If an AI video tool is used, disclose it in the AI Methodology Report (slot 6) for consistency with the brief's transparency requirement.
